PROFESSIONAL SUMMARY

I am a result-oriented Kwame Nkrumah University of Science and Technology graduate with a strong academic background in Computer Science and IT combined with astounding service experience as a Software Developer and IT technician. Offering advanced knowledge of Frontend, Backend and Database programming languages.

CAREER OBJECTIVES

I seek a challenging career with an organization which provides an opportunity to capitalize on my Software development and IT skills in the computer science field.

ABILITIES

- Excellent communication skills
- Fluent in English, Ga, Twi, Buili and Frafra (Gurenɛ)
- Adaptable to new environment
- Ability to work in a fast-paced environment
- Able to produce results in a team driven environment

Hobbies: Reading, Basketball and Learning new programming languages.

EDUCATION

Kumasi, Ghana	Kwame Nkrumah University of Science and Technology	09/2016 to 08/2020
----------------------	---	---------------------------

- **Program:** BSc. Computer Science
- **Programming Coursework:** Programming with C++, Database Concepts and Technologies, Object Oriented Programming with Java, Programming with Assembly Language, Programming with Visual Basic, Mobile Application, Data Structure, Web Based-Concepts and Development.

EMPLOYMENT

Akenten Appiah-Menka University of Skills Training and Entrepreneurial Development (AAMUSTED)

Software Developer, (National Service)	IT Services Unit	09/2020 to 08/2021
---	-------------------------	---------------------------

Payslip Approval App (<http://approval.aamusted.edu.gh>): System for the Approval and Checking of Employee payslips

- Saved the University Money from paying for a similar system online by developing a system for the approval of employee pay by administration and to enable employees check and print their payslips
- Implemented SMS and Email features to notify if approval is needed and to provide employees notification concerning their pay.
- The configuration and connections to databases on the backend and developing APIs with connection on the frontend.
- Configuration of the App to be deployed on a CentOS server using Nginx.
- Leveraged Knowledge in Full Stack Web development, JavaScript, React JS, Node JS, CentOS, Nginx, Git, phpMyAdmin, Bulk SMS, MySQL, MongoDB and LDApp.

Software Developer

Onyin Ghana LTD (Start-up)

09/2020 to 01/2022

Web Applications Development :

- Development of the frontend web application using React and backend application using Node.
- Worked on all aspects of the web application development including API development, database connections, authentication and authorization, state management in react, page routing, and design.
- Setting up and management of MySQL database and phpMyAdmin on AWS (Amazon Web Service) to be used in application development.
- configuring and setting up the deployment of web applications on AWS.
- Leveraged Knowledge in Full Stack Web development, JavaScript, React JS, Node JS, Nginx, Git, phpMyAdmin, Ubuntu, MySQL, AWS EC2, Atlassian, Confluence, Jira and Bitbucket.

SOFTWARE PROJECTS

Personal Websites:

WhatsApp Clone (<https://whatsapp-clone-16e6f.web.app>)

- Developed a Web Application using React and Firebase services for Chatting with a user interface like WhatsApp.
- Implemented a login interface with firebase Authentication using Google.
- Used Context Api for logged in user data handling and firebase snapshots to display real time data from the database without refreshing the page.
- Utilized: JavaScript, React JS, Firebase (Cloud Firestore, Firebase deploy), HTML, CSS.

Netflix Clone (<https://netflixclone2-4b553.web.app>)

- Developed a Web Application using React and Firebase with User interface similar to Netflix.
- Retrieved required data for the App user interface by configuring Axios requests to TMDB Api.
- Implemented a feature that display a trailer from YouTube using a component from YouTube Trailers.
- Utilized: JavaScript, React JS, Firebase, HTML, CSS, Hooks.

Skills

Software: (Proficient): JavaScript, React, Node, HTML, CSS, Firebase, MySQL, phpMyAdmin, MongoDB, Atlassian, Confluence, Jira and Bitbucket Git, Linux, Ubuntu, CentOS, Windows,

(Familiar): Python, Java, C++, C#, AWS, Visual Basic, React Native.
